Certifications and membership

At TiSO, we follow the highest quality standards set by global establishments. We are proud that our products meet the standards of the following respected organizations:

 <p>Certificate of Conformity of Quality Control System</p>	 <p>Perimeter Security Suppliers Association</p>	 <p>United Kingdom Conformity Assessed</p>	 <p>US Department of Defence (DoD) Contractors Health and Safety Assessment</p>
 <p>National BIM Library</p>	 <p>Scheme (CHAS) Accreditation</p>	 <p>Certificate of Conformity</p>	 <p>BIM Object</p>

About us

TiSO is a world class manufacturer of physical security equipment. Established in 1996, TiSO designs and manufactures a comprehensive range of speed gates, turnstiles, pedestrian gates, emergency doors and high security barriers (bollards, road blockers, tire killers etc.).

1996 year of establishment

30 000+ Projects

120+ Countries

10+ Exclusive partners

350+ Employees

4 International offices

Wide range of products:

- TiSO designs and manufactures a wide range of physical security products. We offer a variety of pedestrian access control equipment: such as tripods, speed gates, full-height turnstiles, swing gates, etc.). As well as a large selection of vehicle access control equipment: bollards, road blockers, tire killers, speedbumps, etc.).

International network of dealers:

- Customers consistently provide positive feedback regarding TiSO products, underscoring their reliability and efficiency. Concurrently, the global network of partners continues to expand steadily.

24/7 Customer Service:

- The company offers 24/7 customer service, demonstrating its commitment to meeting the needs of customers when they need it most.

Flexibility and individual approach:

- TiSO's capacity to customize product manufacturing in accordance with individual customer projects enables the company to effectively address the distinct requirements of its clientele.

Modern design:

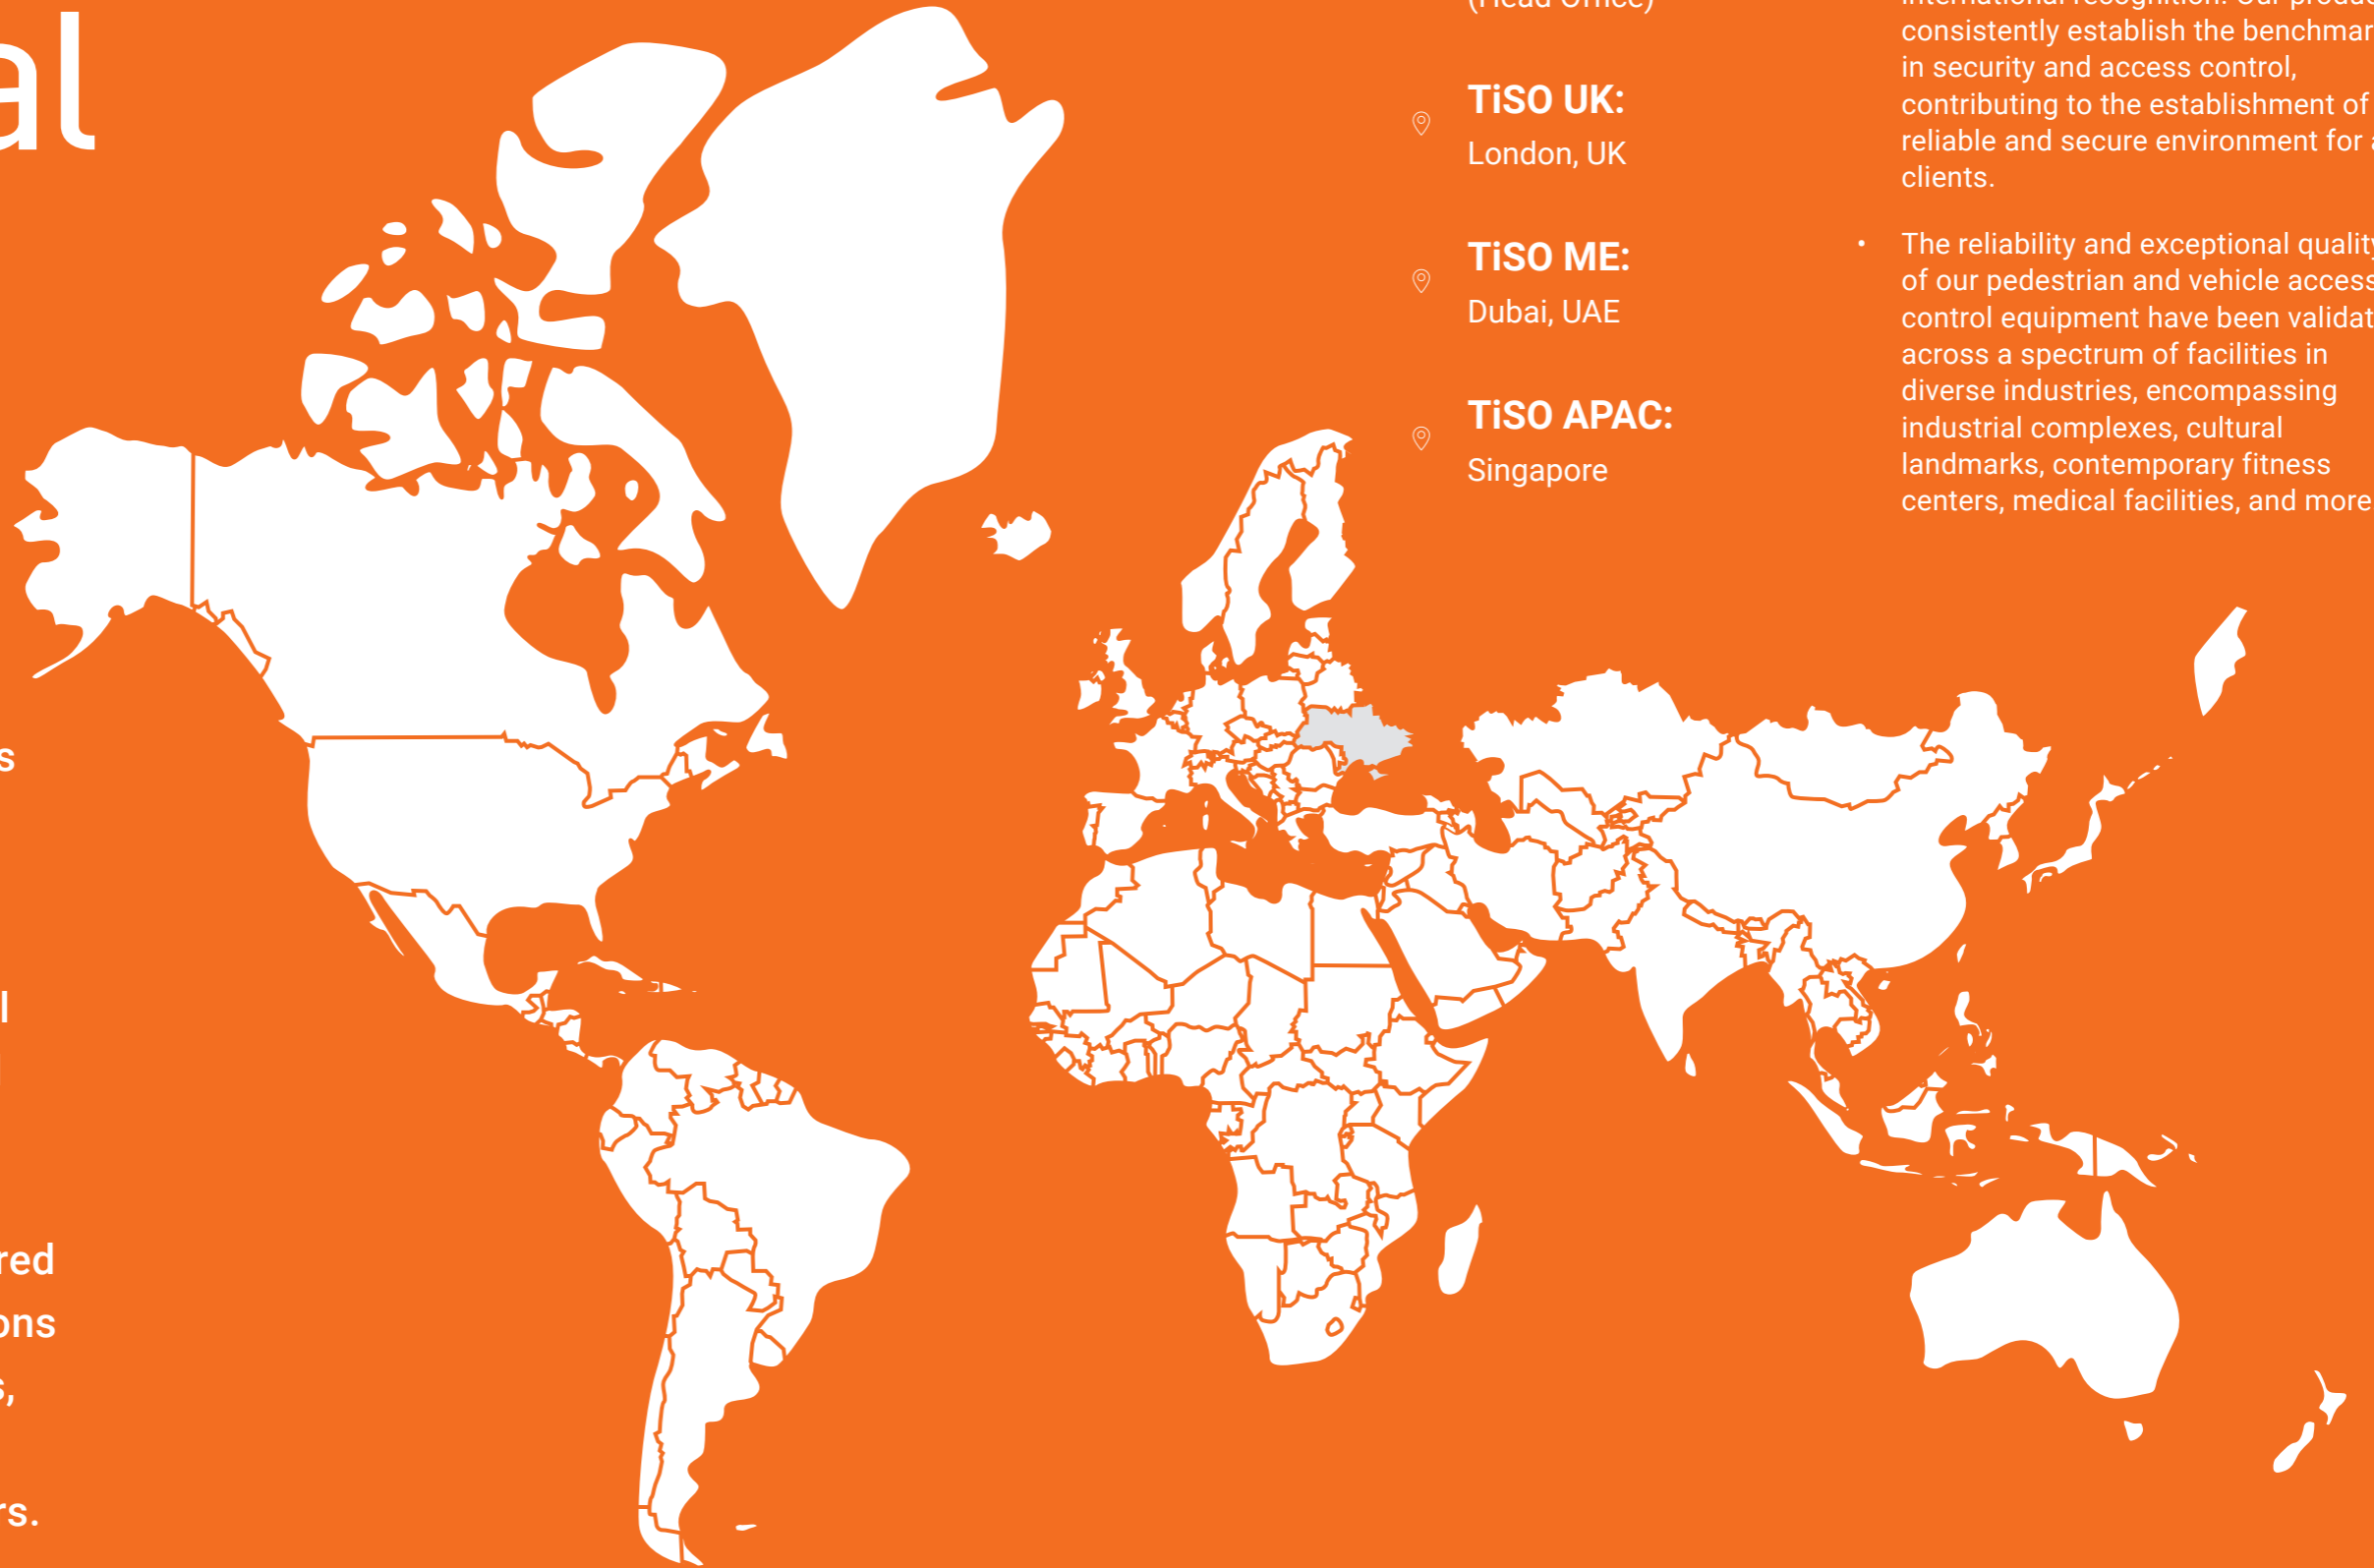

- The product is characterized by not only its superior functionality, but also its contemporary design, enhancing its aesthetic appeal.

Affordable innovations:

- TiSO offers its products at competitive prices, ensuring a high level of product innovation and manufacturability.

Company market global

TiSO's security equipment captivates with its versatility and efficiency, finding application across diverse global locations. Renowned for its high-tech and reliable design, TiSO products have garnered successful installations in over 120 countries, spanning various industries and sectors.

International establishments:

TiSO Production:

Kyiv, Ukraine
(Head Office)

TiSO UK:

London, UK

TiSO ME:

Dubai, UAE

TiSO APAC:

Singapore

- The widespread deployment of TiSO equipment across the globe stands as a testament to customer trust and international recognition. Our products consistently establish the benchmark in security and access control, contributing to the establishment of a reliable and secure environment for all clients.
- The reliability and exceptional quality of our pedestrian and vehicle access control equipment have been validated across a spectrum of facilities in diverse industries, encompassing industrial complexes, cultural landmarks, contemporary fitness centers, medical facilities, and more.

Our vision

Safety and security

These are the key values which have enabled us to achieve our mission.

Personalisation

Despite our busy manufacturing program, we always treat each customer as an individual, and we will always go the extra mile to create a product that fully satisfies their needs and aspirations.

Research and innovation

We strive to create truly innovative and technological physical security equipment. Our R&D development constantly researches the needs of customers in the physical security market and creates products that meet their requirements in the best way.

Eco-responsible

During production, all the requirements of our Environmental Policy are at the forefront of the processes adopted by our company.

Flexibility and agility

Willingness to create a product that fully complies with our customers requirements is a fundamental part of our company's mindset.

Team

Each person in the TiSO team makes an invaluable contribution to production and distribution of our products. All of our full-time employees, partners, customers and end users are equally important and vital to TiSO.

Our mission

Your safety – our main aim!

Let's Make Life Safer – is our motto at TiSO, it's the mindset that encapsulates the beliefs of the entire TiSO team, and sums up in four simple words the secret of our success.

- "Let's Make Life Safer" is our mission statement. We promote this ideology at every stage of the process from first introduction of the TiSO range to our partners, through manufacture, to installation and maintenance of our products on facilities.
- The successful delivery of our mission is ensured thanks to the quality of the products that we manufacture and distribute world wide.
- Recognition of our success in implementing our mission is proven by the positive feedback that we regularly receive from our partners and end users alike, after the successful delivery of projects.
- This we hope makes our mission statement "Let's Make Life Safer" a reality for our many customers around the globe.

Products and services

Pedestrian access control

- Tripod turnstiles
- Swing gates
- Half height turnstiles
- Speed gates
- Full height turnstiles
- Additional equipment
- Access control systems

Vehicle access control

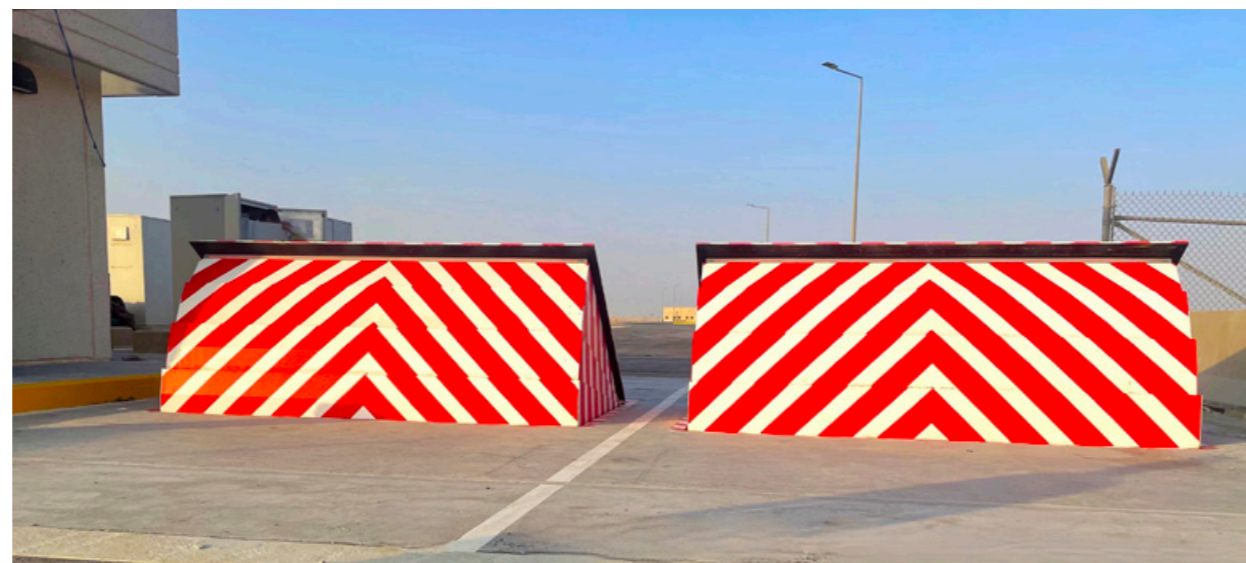

- Traffic bollards
- High security bollards
- Traffic road blockers
- High security road blockers
- Cyclope series
- Speedbump series
- Tire-killers

Fire doors and gates

- Fire resistant doors
- Apartment doors
- Fire resistant gates
- Multifunctional gates

Metalworking

- Metal bending
- Metal cutting
- Metal powder coating
- Metal welding

Manufacturing facilities

TiSO is celebrated for its state-of-the-art manufacturing facility, employing cutting-edge methodologies to craft advanced equipment specializing in perimeter security and access control. Situated strategically across Europe and Asia, our production facilities benefit from their advantageous geographical positioning, affording numerous advantages to our esteemed clientele.

Geographic Presence:

The location of production sites in different parts of the world allows us to more effectively meet the needs of the markets in Europe and Asia, ensuring fast delivery and local customer support.

Quality Standards:

As an European vendor, TiSO is compelled to adhere to stringent third-party validated compliance measures, ensuring adherence to elevated standards of quality and safety. This commitment to rigorous standards is pivotal for customers who prioritize the selection of dependable equipment.

Local Expertise:

Enables the leverage local expertise and market nuances to deliver customized and cost-effective solutions for customers.

Efficiency:

A global presence enables the optimization of production processes and facilitates economies of scale, potentially resulting in more competitive pricing and favorable conditions for customers.

Our people - our pride

The TiSO team comprises dedicated professionals driven by a shared mission: to enhance safety and security.

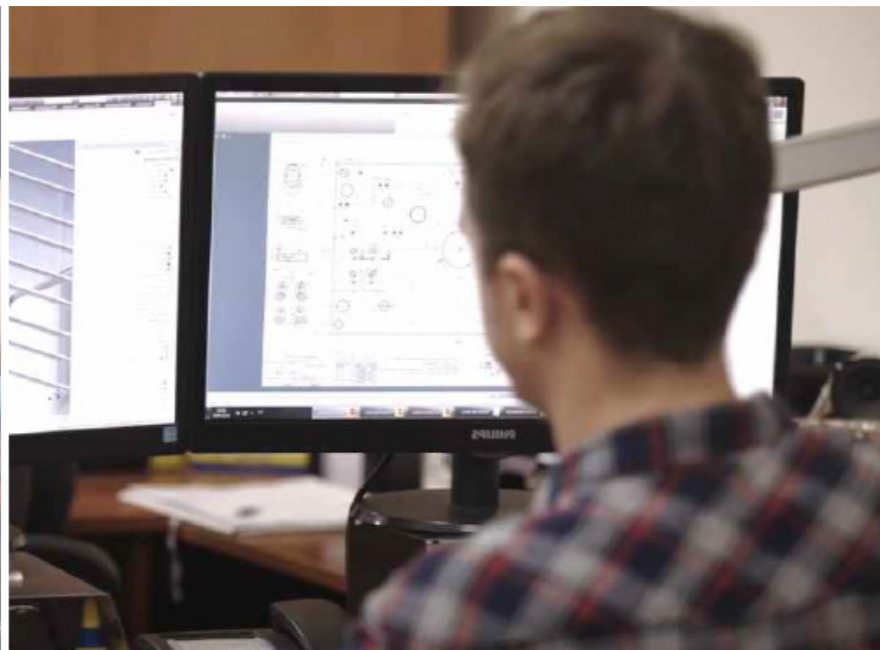

Each member exhibits exemplary diligence, upholding lofty standards and leveraging their expertise to deliver outstanding outcomes.

Their proficiency is further bolstered by a profound commitment, fostering effective collaboration towards common goals and challenges.

The ingenuity and creativity of the TiSO team are evident in their innovative solutions and adeptness at navigating pathways to success.

They continually refine their skills to remain abreast of emerging trends, ensuring the provision of optimal security solutions to clients.

These attributes collectively render the TiSO team a dependable and invaluable partner, delivering top-tier products and services that adhere to the most stringent standards.

Research and development

Our Research and Development department serves as a dynamic intellectual center where our experts innovate revolutionary concepts and technologies, shaping the future landscape of perimeter security and access control.

We allocate substantial resources to scientific research endeavors focused on addressing global challenges and pioneering innovative solutions.

Our multidisciplinary team of researchers brings together expertise from various fields, fostering a synergistic environment that catalyzes the creative process and fosters groundbreaking discoveries. We take pride in our ability to develop technologies and products that challenge existing standards and redefine the industry landscape.

Marketing and sales

■ We perceive our mission not merely as selling products or services, but as cultivating mutually advantageous partnerships. Our sales and marketing teams are comprised of experts who guide and support your business endeavors from inception to fruition, ensuring shared success.

■ We firmly believe that our success is intricately linked to the success of our customers. Therefore, at every juncture, we endeavor to offer more than just a product; we provide comprehensive support and expert guidance in marketing and sales, aiming to facilitate the achievements of our clientele.

■ We are dedicated to delivering not only a product but also a comprehensive suite of support services and expert guidance in the realms of marketing and sales.

■ Our marketing and sales teams collaborate seamlessly, pooling insights and expertise to formulate a cohesive strategy that gives tangible results.

At TiSO, we recognize that the prosperity of our customers directly influences the success of our business. Consequently, we prioritize comprehensive training and support initiatives, ensuring that each of our customers feels empowered and proficient in utilizing our products or services.

Training and support

Our training program is meticulously crafted to furnish you with the comprehensive knowledge and expertise essential for the proficient operation of turnstiles and roadblocks. Moreover, our dedicated support team stands available round-the-clock, poised to address your inquiries and resolve any challenges you encounter. We consider it our duty to deliver efficient and timely assistance, enabling you to maximize the utility of our equipment.

Customers first

We advocate for partnership, collaborative efforts, and transparent communication with each client.

The TiSO team stands prepared to attentively listen and comprehend, delivering tailored solutions that address the unique requirements of every client.

At TiSO, we channel our energy and creativity into developing innovative solutions geared towards enhancing facility security. Our dedicated team endeavors tirelessly to ensure that each customer experiences the utmost quality in equipment and receives personalized attention to their needs.

Our «customer first» approach transcends mere rhetoric; it embodies our deeply held belief and unwavering commitment to every individual who selects us as their partner.

Sustainability

For us, sustainability represents not only an environmental obligation but also a strategic imperative towards fostering enduring success. Companies committed to sustainability not only address immediate challenges but also fortify their businesses for a future where environmental stewardship assumes a central role in corporate ethos.

Our approach to sustainability encompasses several pivotal facets. We actively pursue innovative solutions aimed at curbing energy consumption and emissions, championing environmental cleanliness and the preservation of natural resources.

Every facet of our operations is meticulously crafted with environmental sustainability at its core. We aspire to serve as a beacon, inspiring others to embrace eco-friendly solutions and cultivate a harmonious world for future generations.

Collectively, we have the power to effect profound change, inspiring others to take decisive action and crafting a narrative that will indelibly shape both the landscape of sustainability and our environment.

Innovations must be affordable

In a landscape driven by innovation and advancement, the TiSO team remains steadfastly committed to crafting cutting-edge equipment that aligns seamlessly with our customers' evolving needs. Our overarching mission is to democratize innovation, rendering innovative technological solutions accessible to all. Fueled by the expertise of our skilled specialists, we embrace challenges with fervor, transforming ambitious visions into tangible realities.

Irrespective of whether we encounter technical, economic, or social hurdles, our resolve remains unwavering in finding pathways to success. We firmly advocate that innovation should be within reach for all, and thus, our endeavors are geared towards ensuring affordability.

Through our range of speed gates and road blockers, we endeavor to enhance lives globally, delivering tangible value and fostering positive societal change. Our team remains steadfast in our commitment to catalyzing positive transformation by disseminating innovation and ensuring the cost-effectiveness of our products.

Beyond merely creating technology, we perceive ourselves as catalysts for a new era of industry evolution. Our relentless efforts are geared towards not just creating innovation, but also democratizing it. We firmly believe that innovation should be accessible to all, and we are unwavering in our pursuit of realizing this vision.

Exhibitions

For over 25 years, TiSO has been a consistent presence at international exhibitions. These platforms afford us a significant opportunity to showcase our cutting-edge solutions and technologies to a diverse global audience.

Participation in international exhibitions provides us with an excellent opportunity to interact with other industry players, exchange ideas and experience.

As well as with customers and partners, allows us to improve our products and respond to the growing needs of the security industry.

ASTM F2656

MAKING LIFE SAFER SINCE 1996

TiSO was originally founded by ambitious entrepreneurs from engineering backgrounds. They began their journey by the production of small high quality architectural constructions. Within a couple of years, most of Kyiv shopping and trade malls, office buildings and hotels were equipped with TiSO steel staircases and fences.

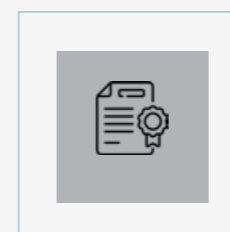

The first large scale project with turnstiles, which defined the future of our company, was a project for the Chernobyl nuclear power plant, where there was a need for a safe and secure access and egress strategy to and from the plant.

Development

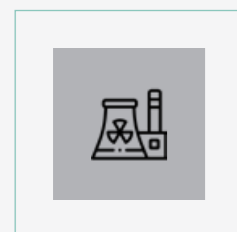

A radical change of course was initiated during the mid-00's, when TiSO realised the need to become a global manufacturer of security equipment. In order to establish the TiSO brand now known throughout the international security community, we have invested heavily in international trade shows, and first presented our products at IFSEC security exhibition in Great Britain.

Exhibitions

We continue to maintain our strong position by investing in the latest digital control systems, implementing new and innovative systems of working, continuously improving the skills of our employees and influencing changes in the industry. Expanding our global presence as well as increasing sales of our products has enabled us to expand our production capacity by the construction of new workshops and the acquisition of the latest production equipment.

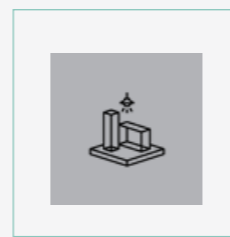

Today our production complex, which is located in Kyiv, Ukraine, is situated on a 21,000 m2 site. At present we run 4 international offices (Kyiv, London, Dubai, Singapore), have 23 official brand representatives around the world and 30,000+ completed projects in more than 120 countries around the world.

Foundation

During this period our company's development involved manufacturing growth and building up of our distribution network. It was during this time that TiSO created a strong distribution family for internal market within the Ukraine.

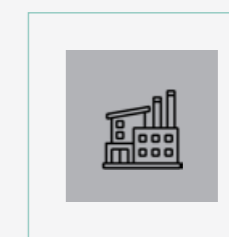

We always respect loyalty, and are flattered that companies with whom we established relationships during this developing stage, remain our partners to this day.

Change

The presentation of TiSO products at exhibitions in the UAE, UK, China, Germany and the Netherlands increased demand for the products and helped expand international partnerships. Regular analysis of the security market allowed us to identify another trend that is gaining momentum over the years – physical perimeter protection.

Thus, the management of the company decides to open a line for the production of road blockers and bollards. At first, these were simple devices for organizing parking. And only then we started production of anti-ram (antiterrorist) road blockers and bollards. The key for us was the confirmation of the anti-ram properties of our equipment, so we certified it in accordance with the international standards ASTM2656, PAS68 and IWA14.
